PROFILE

Surface print illustrator with 10 years of experience in the creative industry. Currently pursuing a postgraduate degree in Innovation and Technology in Surface Pattern Design at SENAI CETIQT, conducting research and experimentation in surface design.

Open to remote freelance projects and collaborations in surface design, illustration, and academic research.

RECENT EXPERIENCE

Surface Textile Designer

Tayriel • Feb 2026 – current

- Freelance print designer, developing original collections and custom projects on demand. Creation of placement prints and all-over patterns, development of seamless repeats , and adaptation for application across various products.

Surface Textile Designer

Dentro D'agua • Apr 2025 – current

- Responsible for the development of all-over and placement prints, including the creation of print repeats and placement designs precisely adapted to garment patterns, as well as the preparation of final production-ready files and the creation of technical specification sheets for printing. Also responsible for the implementation and development of mockups in Clo3D to validate measurements, ensure precise print placement, and provide high-fidelity, realistic visualizations that align with the final product.

Manager of Product Development

Nevon Vestimentas • Jan 2024 – Mar 2025

- Managed the design and development of waterproof, high-visibility, and corporate apparel for both the public and private sectors. In this role, was responsible for developing various products for government tenders, delivering samples that strictly met specifications within short timeframes (3 to 5 days).

Previous experience in Digital Marketing

- Over 5 years of experience in digital marketing, social media management, and creative content development.
